THE WEALTH OF NATIONS. By ADAM SMITH. Edited, with an Introduction and numerous Notes, by EDWIN CANNAN, M.A. 2 vols. demy 8vo, 21s. net.

The need has long been felt for a scholarly edition of the great work which has had so great an influence on English commercial policy. For the first time the various editions published in the lifetime of the author have been collated, and the results are carefully recorded, so that the reader is able to see how far Adam Smith's second and third thoughts differed from his first. The editor has added a full marginal summary, so that he who runs may read, and his index (which incorporates Adam Smith's own work) is much more complete than any yet published. In the notes he has endeavoured to give all necessary references and explanations, while avoiding the mistake of overlaying the text with expressions of his personal opinions.

THE COMPLETE MOTORIST. By FILSON YOUNG. With many Illustrations. Demy 8vo, 12s. 6d. net.

The aim of this book is to provide for the amateur o automobilism a complete work which, while it covers the whole ground of the construction, maintenance, and use of motor-cars, will be appreciated by the large and rapidly increasing number of motorists who have no technical knowledge of the subject. The author has endeavoured to write a work that will be in itself a sufficient literary equipment for beginners, and a useful guide as well as a pleasant companion to them in their career as automobiliats. The work is fully illustrated, and is of considerable length.
In one chapter of the book, entitled "Some Personal Views," Mr. Rudyard Kipling has expressed his views on various aspects of automobilism. His contribution is of some length.

The descriptions have been written mainly from the books themselves, often from those known to have been formerly in use in specified Parish churches. This is an attempt to render in words the peculiar fascination of modern Japan by one who has fully felt it through a year's diligent and undistracted idleness in Tokyo and other places little trodden. This book eschews all statistics, forecasts, points of view.
